Notes:

1) Tuition and fees are shown as a combined amount. Many are shown in a range dollar amount due to potential discounts for siblings, religious involvement, and/or early payment.

2) Graduation rates were difficult to establish due to lack of data, however, all of the private high schools I contacted stated that every senior who started 12th grade with them, graduated. Schools also stated that over 90% of students who started 9th grade with them, also graduated.
